### Workshop and Environmental Solutions

#### Parts Cleaning Machines available for Rental or Purchase

- Greaseater Parts Cleaning Machines
- Low Voltage Parts Cleaning Machines
- Filtered Parts Cleaning Machines
- Automatic Gun Wash Machine
- Hot Spray Wash Machines
- All equipment serviced and maintained by our expert technicians

#### Spill Equipment

- Spill Kits made to order and delivered
- Comprehensive range of absorbent products
- Unique Service Program - Fulfill your environmental duty of care
- Training and site audits

#### Waste Collection and Disposal

- Oil Filters, Oily Rag and Absorbent Waste
- Waste Coolant and Oily Water
- Waste Oil, Waste Thinners, Brake Fluid

#### Cleaning and Safety Products

- Hand Cleaning Stations
- Hand Cleaners, Floor Cleaners, Disinfectants, Degreasers
- Safety Glasses, Gloves, Dust Masks, Overalls

#### Cleaning Cloth Division

- Rag Supply in several Varieties

#### Environmental and Waste Water Equipment

- Oil / Water / Solids / Separators
- Water Recycling Systems, Diversion Valves

## Parts Cleaning Machines for Every Application

### Model 86

At the flick of a switch the light comes on and cleaning fluid is pumped through the flexible hose and brush to clean a variety of parts.

- Quality construction, Robust, Reliable
- Several models available to suit various site requirements including:
- IP Rated and Triple Insulated

### Filtered Parts Washing Machine

This machine is built with the tried and tested Model 86 Bowl, Lid and Light combination and now is incorporated with a unique quadruple filtering system to ensure constantly clean fluid.

The machine is the only machine that consistently achieves ISO1613, which is an internationally recognised standard for measuring liquid cleanliness and quality.

### Model 86 LV Low Voltage

With the increasing emphasis on Occupational Health and Safety we have developed a unique Low Voltage Parts Cleaning Machine.

The machine is IP65 Rated and uses a 12 Volt Pump. This is the safest Parts Cleaning Machine available.

### Model 96

This Machine has been designed for cleaning large heavy components and doubles as an overnight soak tank.

Built with the same pump and light system used on the model 86, this machine is an ideal addition to any large workshop.

### Lowliner

This trolley machine is designed for use working under machinery, cars and trucks.

The air powered unit supplies GB250 through a flow-through brush on to the are to be cleaned

## FILTERED PARTS CLEANER SOLUTIONS

Incorporated with a unique quadruple filtering system to ensure constantly clean fluid.

The only machine that consistently achieves ISO1613: An internationally recognised standard for measuring liquid cleanliness and quality.

### Filtered Parts Washing Machine

#### Description and Features

The Model F07 Filtered Parts Cleaning Machine filters out contamination particulate in order to achieve a desired level liquid cleanliness. The fluid remains free of contaminants for an extended period ensuring cleaner parts as well as faster and more efficient cleaning.

The Model F07 has been designed to accommodate industry requirements for achieving a level of liquid cleanliness to satisfy the standard applicable to ISO 16 /13.

The unit has been designed around the well-recognised GREASEATER bowl, which is the benchmark in the parts cleaning industry. The design also accommodates the multitude of variations for parts cleaning.

- It has four-filtration medium, which are easy to replace.
- Filtration medium size can be altered to suit a specific requirement and are easily accessible.
- Incorporates a continuous filtration mode, which continually cleans the solvent while not in use.
- Extends life of cleaning agent.

This unit can be configured to meet specific requirements pertaining to the client needs:

- Requirement for ISO 16 /13.
- Satisfy specific filtration of cleaning agent requirements
- Extended life of cleaning agent.
- Designed in Australia.
- Built in Australia.

## LOW VOLTAGE PARTS CLEANER SOLUTIONS

### LV Parts Washing Machine

With the increasing emphasis on Occupational Health and Safety we have developed a unique Low Voltage Parts Cleaning Machine.

The machine is IP65 Rated and uses a 12 Volt Pump.

This is the safest Parts Cleaning Machine available.

### Greaseater

#### Description and Features

Greaseater Model 86 LV Parts Washer was designed and built to meet specific heavy engineering workshop requirements in respect to higher Occupational Health and Safety Requirements.

The Parts Washer is based on the popular Model 86 Machine. The Model 86 LV Machine operates on a 12V DC system with all electrical components housed in IP 65 rated enclosures. This unit is triple insulated and ideal for operation in wet areas.

At the flick of a switch the light comes on and the cleaning agent is pumped through the flexible hose and brush to clean a variety of parts. The fluid drains back through a strainer into the base as part of the recirculation system.

#### Specifications

Construction	Fabricated steel base with pressed steel bowl Base and bowl powder coated
Capacity	Base operating capacity is 60 litres
Bowl Dimensions	910mm x 580mm x 155mm
Working Height	760mm
Weight	65kg (empty)
Electrical	Input 240V input 50-60Hz Operation 12VDC 10amp Triple Insulated IP65 Rated Complies with AS/ANZ 3000:2007
Options	Small Parts tray Flow through Brush and Tube assembly

**Lease / Service / Sale Packages to suit**

### Hot Spray Wash Machines

#### The Right Parts Cleaning Machine for the Right Job

Hot Spray Wash Machines are an excellent addition to any workshop, large or small. The Enviro Hot Spray Wash Machine cleans parts using the same principal as a household dishwasher. Simply place the parts to be cleaned in the internal basket, close the lid, push the start button and the machine will do the rest. This leaves the operator free for other more productive work.

#### High Impact Parts Washing

Bulbeck Enviro don't offer just one type of machine. Most suppliers will tell you that their machine is the best, because that's all they have. We have an extensive range of Parts Cleaning Machines for your workshop. We provide a workshop auditing service to help you improve efficiency and workflows in your workshop and to ensure you have the right Parts Cleaning Machines for the job. We can provide Machines in various sizes and set ups including Filtered Machines, IP Rated Machines, Soak Tanks and mini machines. Hot Spray Wash Machines are available in various sizes for all requirements.

#### Workshop efficiency improved when teamed with an effective Parts Cleaning Machine

Hot Spray Wash Machines are an excellent addition to any workshop, large or small. Working in combination with your other Parts Cleaning Machines, the Hot Spray Wash is ideal for larger jobs or when you have a large volume of parts to clean. Workshops that utilise both types of Parts Cleaners use the manually operated Machine for immediately required, repetitive jobs and the Hot Spray Wash Machines for the bulkier, volume jobs that can be set and left for later.

### BlastVac—Protect against Corrosion

The blast-vac is an ideal addition to any panel workshop. The blast-vac blasts away rust and corrosion while reclaiming the grit via a vacuum system.

#### Features:

- Dust-free Blast-vac preserves the surface and protects your environment
- Blast-vac rust without heavy protective clothing or expensive breathing apparatus
- Blast-vac gives you a distortion-free prepared surface ready for priming
- Saves time and money by minimising preparation and clean up
- Eliminates grinding and sanding
- Filter unit is easily removed for cleaning, adding abrasive to the reservoir and for emptying the dust and debris container

### PaintEater — Gun Cleaner

The Painteater is an automatic Spray Gun Cleaner. Using Gunwash Thinners the Painteater cleans the interior and exterior of spray guns and pots.

#### Features:

- Saves time and money by allowing staff to work on other jobs while equipment is cleaned automatically
- Polished stainless steel bowl which sits on the top of standard 60 Ltr drum
- Fully enclosed reducing the risk of staff being splashed by thinners
- Air operated
- Purchase or rental and service available

**Lease / Service / Sale Package designed to suit your particular requirements**
