

SpillPro®

More than just a Rag

At SpillPro, we supply a wide range of industrial rags designed for demanding applications across workshops, manufacturing sites, transport depots, and other applications. From wiping down oily parts to polishing finished surfaces, our rags are built to perform in the toughest of environments.

SpillPro rags are made from quality recycled textiles, carefully cut and sorted to meet strict standards for absorbency, durability, and safety. By giving new life to these materials, we help reduce textile waste and support a more sustainable future.

With over 60 years of experience, we've built a reputation for supplying rags that perform in a wide variety of applications — from machinery maintenance and surface preparation to polishing and general cleaning. Each rag type is available in convenient 10kg bags, designed with OHS in mind.

To make supply simple, we offer bulk discounts and FIS local delivery, along with rag bin servicing and disposal to help you manage oily or contaminated rags safely and compliantly.
